

# Assembly Presentations

## Your students can learn life saving skills in 10 minutes

Accidents can happen at any time and sometimes the only person available to help is a young person. St John Ambulance offers FREE first aid assembly presentations at schools so students can learn what to do if they are faced with a first aid emergency.

The demonstrations are approximately 10 minutes long and aim to equip students with the skills to assess and respond to specific first aid situations. They are delivered by our experienced Community Education Officers who have Working with Children Checks. All the school needs to provide is a computer, projector and a screen.

Schools can select from the following free 10 minute assembly presentations:

- Sprains and Strains
- Burns and Scalds
- Snake Bites
- Allergic Reaction
- Electric Shock
- Spinal Injuries
- Choking
- DRSABCD
